Sales and New Business Dev. Professional in the Creative Structures industry

“ To All Concerned:

It has been my pleasure to know Slavi Hristozov since 2002. Slavi has been an instrumental person in his affect on my career in many ways. He is talented at a great many disciplines and puts all he has into his work every day.

He is the most knowledgeable computer expert I have ever known and the most diligent project manager I have worked with in the exhibit business.

He is also a fantastic teacher. When I began my freelance design career Slavi trained me in 3DStudioMax. He was instrumental in helping me to get up and running as a viable consultant in the fast-paced freelance exhibit design business.

Slavi also has been a trainer and teacher to my wife, Karen Dangremond, who has assisted and consulted with in her graphic and web design business. Slavi has enn her right hand man on many successful web site development projects and has been a technical consultant on a frequent basis.

When I joined Dimension Craft as an Account Executive in 2006 Slavi became my go-to project manager on whom I relied every day to make sure the details of my jobs were executed and ran smoothly-- which they did. He also assisted me greatly in the capacity of 3-dimensional and graphic design support.

Additionally, Slavi is highly skilled with a camera. While this started as his hobby, he was recruited by our company to be our official show photographer. His photos of our booths rivaled the best of any I have seen by professionals and are used in all of our marketing and sales materials. He also is expert with photo-retouching software.

More than just having exceptional diversity, Slavi is a pleasure to work with. He is well liked by all of his co-workers and has made lasting

friendships with many of them. I have been a personal witness to his cool disposition under pressure and his devotion to excellence even when circumstances such as tight deadlines or long hours were very difficult.

I have huge respect for Slavi and I highly recommend him to anyone looking for a tremendous asset as an employee or partner..

Sincerely,
Alex Gordon
